Etere Wins MMTC

MMTC, a University in Yogyakarta, Indonesia has chosen Etere for its Multimedia Training Centre to to teach and train students.

MMTC logo

MMTC, Multimedia Training Centre, is a University in Yogyakarta, Indonesia.

MMTC has a small station for the campus where they have setup a TV studio and Master control room to teach and train students about real TV operations.

They have chosen Etere as it's the best advanced system on the broadcasting market. It represents a benchmark for any future automation system. The system is small but it includes all the technologies of an advanced television:
- Videoserver based playout
- Integrated browsing system for Tapeless operation
- Off air logging recording for quality check
- Control of primary and secondary events
- Media asset management system
- SMPTE based metadata database

MMTC

MMTC System Controls:
- Grass valley Turbo videoserver
- Evertz router
- Evertz master control
- Evertz logo generator
- Sony E_vtr

MMTC

Etere TV management solution has greatly improved students' training on how a TV station operates.
The University management feel confident that the system they have chosen will satisfy all their key requirements and provide a good solution.

Etere, a consistent system!
