# Powerpoint: Etere Web Services

The presentation describes how Etere Web Services interface Etere with the external environment and with SOA-compliant architecture.

Etere Web Services
Diagram

Etere Web Services interfaces Etere with external environments and it is also compliant with SOA architecture.

Etere Web Service enables communication between the different applications used in your system. It is based on a SOA open architecture that includes the following suite of functionalities:

■ Interoperable services that can be used within multiple, separate systems from several business domains
■ Integration of all applications used within multiple and separate systems from several business domains
■ Uses multiple implementation platforms
■ Converts all your applications into web-applications
■ Integration of all applications within a TV station for a web-based environment

Download the attached **Etere Web Services** Solution Powerpoint for a complete list of features and key advantages.

Presentation Slides
