Etere releases new capabilities for **Etere Nunzio** that allow users to manage complex stories with multiple video elements including video files, live streams, graphics and secondary media files simultaneously, quickly and accurately. The update is available at no additional charge for customers.

The integrative Etere Nunzio platform allows the automatic/manual playout of all videos and video elements. Operators can also play the individual video elements of complex stories individually. The software features multiple playback windows on a single platform, enabling the playback of multiple video elements without switching screens.

For a seamless management of all news stories, Etere Nunzio features quick keyboard shortcuts to all important controls. For example, operators can put the story on-air instantly or insert individual video elements in the playlist quickly with shortcut keys. Once the story has been played, the operator can arrange for the playout of the next story with another keyboard shortcut key. The new capabilities benefit users with convenient access, faster controls and a coordinated approach to the management of complex news stories with multiple video elements.

Etere Nunzio is a NRCS newsroom computer system that is capable of managing the end-to-end management of the newsroom workflow from the preparation and editing of media assets to the delivery and playout of news stories. Etere Nunzio is part of the **Etere Media Enterprise Resource Planning (MERP)** framework of modular and scalable software solutions that integrate multi-site systems for a holistic approach to broadcast planning and management.

The newsroom environment is one that is extremely fast-paced and operators often deal with large volume of data and tight deadlines. To support the demands of a dynamic newsroom, Etere Nunzio NRCS Newsroom is designed with the capabilities to help users to adapt quickly. It is also extremely flexible, providing a wide range of options to cater for the delivery and playout of multi-format files, even those in large volumes. Etere users are able to completely digitize their newsroom operations with an all-in-one **NRCS newsroom computer system** that is fully scalable to fulfil the requirements of all companies, from a single station setup to media enterprises.

With the launch of the latest update for Etere Nunzio, newsroom management of complex stories with multiple video elements is fast and easy.

About Etere

Etere was established in 1987 in Italy and it is amongst the worldwide leaders in Media Asset Management (MAM) and channel-in-a-box software solutions. Etere Media Enterprise Resource Planning (MERP) framework of scalable solutions are used by media enterprises across the end-to-end workflow.
