

Etere Video Editor is born

Etere is proud to announce Etere Video Editor the latest extension of the Media Asset Management solution. Integrated with MAM, users can easily edit assets directly from MAM database.

Etere Video Editor

Video Editor Main Interface

video editor

video editor

Etere is launching its latest upgrade to the **Etere Media Asset Management** solution, the **Etere Video Editor**. With its integration into the **Etere Media Asset Management** solution, enjoy easy imports and exports of your projects with your **Etere Video Editor** directly linked into the **Etere MAM** database. Offered as a free upgrade to users of the **Etere MAM** solution, users can expect stunning graphics, a full range of effects, animations, audio control and editing tools, so that users can edit their files to their fullest potential.

An Extension of Media Asset Management

Etere Video Editor is directly linked to the **Etere Media Asset Management (MAM) system**, streamlining your production process as not only can you save projects to the **Etere MAM** database, you can edit the media and objects stored in your **Etere MAM** database, and your work will be safely archived by the **Etere HSM Archive**.

Powerful Editing Capabilities

With a strong key frame animation framework, **Etere Video Editor** introduces an unlimited number of key frames and tracks and layers allows users to animate and enhance anything in their videos. Users are free to preview their work whenever with the unlimited preview system. Equipped with over 400 transition and effects, including brightness, hue, and slow motion time effects, and controlled with drag and drop access, the **Etere Video Editor** is an easy to use and detailed editing system.

The **Etere Video Editor** will be offered as a **free of charge upgrade** for users of the **Etere MAM** solution. Revamp your workflow with the full suite of possibilities offered with **Etere MAM**.
