Etere at CABSAT 2012

Great interest for Etere MERP during CABSAT show in Dubai

We would like to remark that Etere is the only company worldwide able to offer a truly MERP solution for broadcasting. Etere MERP is an innovative solution that will provide today with a comprehensive workflow throughout for tomorrow's standards and thus give you a big advantage over your competitors, this, thanks to a key feature: Etere uses one framework and one database for all business together with an increase the productivity in a better workplace.

The Etere's booth at CABSAT (S2-C2) will illustrate how broadcasters can use our MERP and thus leverage a lot of advantages including:

- Single database containing all data for the software modules across an entire company
- People in different departments can view and update the same information
- Standardizes and reduces the number of software specialties previously required
- User-friendly and completely tailored interface
- Paperless approach to help the environment
- Real-time scheduling and conflicts management
- Total control over resources, processes, and costs
- Flexible tool to easily streamline inefficient workflows
- Tightly integrated billing and accounting features
- Time and cost savings for content resources management
- Fully tapeless workflow for the management of assets

The time for applying the ERP concept to media companies has now come... Don't be late!
