Editor XCOD to MP4

ETERE, the worldwide leader in software solutions for broadcast and media companies, announced a new transcoding solution for file-based workflows, a transcoder able to provide all major format conversions required in production, post-production, broadcast and distribution environments.

Etere Data Mover

In these days, where file-based video is the common standard for media workflows and content is being more and more ingested from different sources, encoded at different bitrates and formatted in different standards, an automated transcoding system becomes crucial within any workflow. With Etere Transcoder your files will be always in required places at the right time, with the right format!

Etere Media Library

Key Features

Etere Transcoder is the solution that ensures an advanced level of transcoding for your media, giving you all the advantages of a reliable automated system powered with the following features:

- Smart workflow-based management
- H.264 encoding at different resolutions
- XDCAM HD 50 PAL/NTSC encoding
- XDCAM IMX 30 PAL/NTSC encoding
- Up conversion and aspect ratio change
- Down conversion without aspect ratio change
- AAC and MP3 audio encoding
- Timecode burn-in on video

MERP CLOUD

Etere Transcoder is part of the MERP Cloud framework provided by ETERE, its high flexibility and scalability allows a smooth integration with all other modules such as Browsing and Subtitling. Starting with version 24.02, Etere Transcoder will be provided for free along with DataMover, the media engine that controls the execution of workflow actions with streamlined concurrency and parallelism.
