revolution for DAB - See the Video!

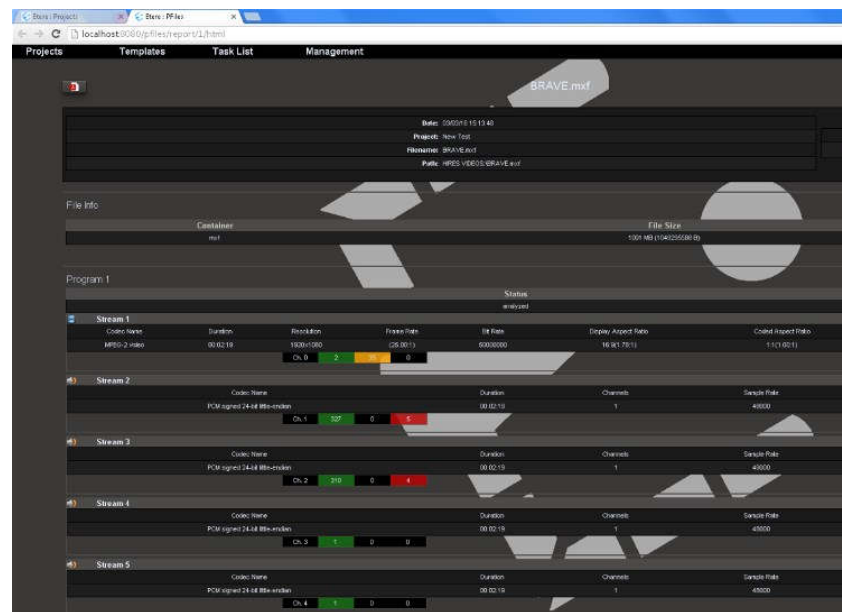

Daniel Bruskowski: "We develop our speakers WITH A LOT OF PASSION AND HEART."

Etere unveils the all-new cloud-ready solution that is able to enable significant QC tasks due to the fact that it is not necessary to reanalyze content in the thresholds.

WEBINARS

The Power of Choice - Meeting the Challenges OF UHD ACQUISIT ...

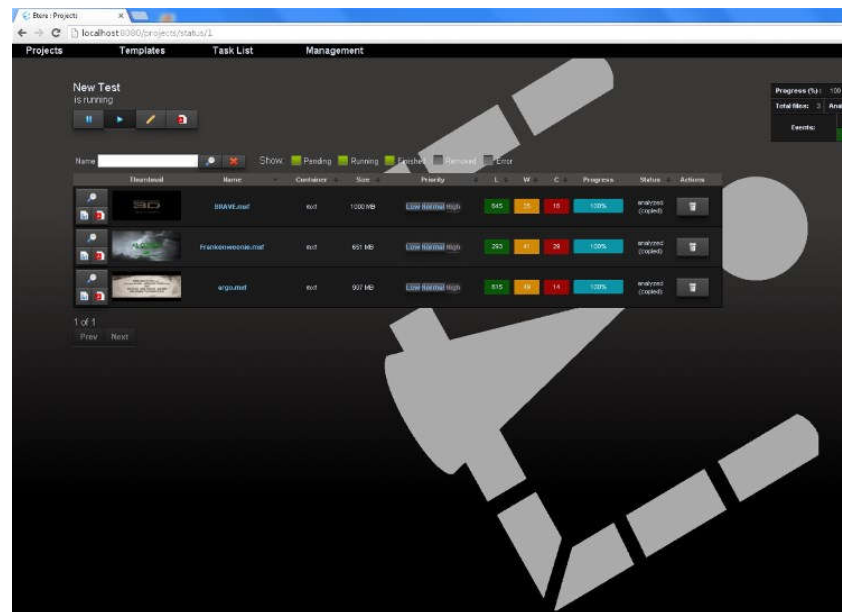

Etere is amongst worldwide leaders in broadcast technologies and is always at the forefront of the latest technology. Etere provides unmatched value and will be part of Etere MAM at no additional cost. In its latest release, Etere unveils the next generation Etere Advanced QC which comes with all-new and advanced features.

Integrated and In-depth Analysis

Etere Advanced QC is built with an integrated modular architecture and is designed for comprehensive Quality Control (QC) via workflow. The advanced video quality control system is able to analyze an expansive list of file formats including support for various wrappers and all compression schemas.

Etere Advanced QC is a cloud-ready solution that is able to automatically detect and report on audio / video issues such as freeze frames, black frames, scene changes, and more.

block, video blur, luminance line errors, chrominance line errors, audio clip detection, luminance headroom violations, chroma headroom violations are the robust and comprehensive software has the capacity to deliver analysis. Etere Advanced QC also comes with clustering and easy load balancing.

Capable Multi-tasking

The powerful multi-tasking solution is capable of supporting simultaneous formats, multi-levels reporting environments, multi parameters analysis and multiple and simultaneous sources.

Etere basic QC license will be part of Etere MAM at no additional charge. With comprehensive features, Etere Advanced QC is set to become a valuable tool for you to maximise your assets and produce quality content.
