FOR IMMEDIATE RELEASE

The archiving of your documents with ETERE Document Management

May 17th, 2004 – ETERE extends its concept of 'one solution for your station' to document management.

Now you do not need any external system to manage your papers; all your documents will be just a few clicks away!

With ETERE you can discover a whole new way to store and manage your documents. It has all the proven features and tools which make managing your *paper and electronics documents* simple and efficient.

With ETERE you can store in one line of scheduling the fax that tell you to change the program, or in a commercial schedule the request of the customer to change the onair time.

On every asset you can store, orders, receipt, parental rating declaration all the papers that now live around you can be stored inside the same system you use to be onair.

Adding documents couldn't be easier. ETERE can be used with any TWAIN compliant scanner and can scan documents with or without an automatic document feeder.

ETERE Document Management is compatible with virtually any kind of document: text files, spreadsheets, graphic images, web pages, CAD drawings, zip files, executables, etc.

Virtually every file type in Windows can be managed by ETERE

After tapeless the television is now paperless.

Further information about ETERE solutions is available on the internet site: www.etere.com
